SpokeArt

Spoke Art is a company specializing in the production of fashion accessories constructed predominantly of recycled bicycle parts. We hand make wearable pieces of art in Morgantown, WV that are both stylish and unique. Our products currently include a variety of bracelets and earrings that have significant appeal to both bicycle enthusiasts and fashion conscious non-cyclists. We stay “green” by working with local bicycle retailers and non-profit organizations to source our raw materials. Our finished products have been sold in a bicycle retailer and in an art gallery and we hope to expand the business to bring our distinctive, affordable, artisan goods to specialty retailers across the country.
